

# Adverse Childhood Experiences (ACEs)

Childhood experiences, both positive and negative, have serious impact on lifelong wellbeing across multiple domains. Adverse Childhood Experiences (ACEs) have been linked to decreased educational outcomes, risky health behaviors, chronic health conditions, and early death. As the number of ACEs increases, so does the risk for these outcomes.

**Join Greater Mankato Area United Way,  
MSU, Mankato & LSS The Reach to learn about ACEs  
and becoming a more trauma informed community!**

**FREE Opportunity to Learn about Adverse Childhood Experiences:**
